## FeatureTraining log regression

varatharajan

July 27, 2018

- a. Predict the no of comments in next H hrs
- b. Use regression technique
- c. Report the training accuracy and test accuracy

## **Data Set Information:**

The Dataset is uploaded in ZIP format. The dataset contains 5 variants of the dataset, for the details about the variants and detailed analysis read and cite the research paper

@INPROCEEDINGS{Sing1503:Comment,

AUTHOR='Kamaljot Singh and Ranjeet Kaur Sandhu and Dinesh Kumar',

TITLE='Comment Volume Prediction Using Neural Networks and Decision Trees',

BOOKTITLE='IEEE UKSim-AMSS 17th International Conference on Computer Modelling and Simulation, UKSim2015 (UKSim2015)',

ADDRESS='Cambridge, United Kingdom',

DAYS=25,

MONTH=mar,

YEAR=2015,

KEYWORDS='Neural Networks; RBF Network; Prediction; Facebook; Comments; Data Mining; REP Tree; M5P Trees.',

ABSTRACT='The leading treads towards social networking services had drawn massive public attention from last one and half decade. The amount of data that is uploaded to these social networking services is increasing day by day. So, there is massive requirement to study the highly dynamic behavior of users towards these services. This is a preliminary work to model the user patterns and to study the effectiveness of machine learning predictive modeling approaches on leading social networking service Facebook

## **Attribute Information:**

(39 - This describes the H hrs, for which we have the target variable/ comments received.

, 54 -Target Variable - Decimal Target The no of comments in next H hrs(H is given in Feature no 39).

Page Popularity/likes

Decimal Encoding

Page feature

Defines the popularity or support for the source of the document.

2

Page Checkins's

**Decimal Encoding** 

Page feature

Describes how many individuals so far visited this place. This feature is only associated with the places eg:some institution, place, theater etc.

3

Page talking about

**Decimal Encoding** 

Page feature

Defines the daily interest of individuals towards source of the document/ Post. The people who actually come back to the page, after liking the page. This include activities such as comments, likes to a post, shares, etc by visitors to the page.

Δ

**Page Category** 

Value Encoding

Page feature

Defines the category of the source of the document eg: place, institution, brand etc.

5 - 29

Derived

**Decimal Encoding** 

Derived feature

These features are aggregated by page, by calculating min, max, average, median and standard deviation of essential features.

30

CC1

**Decimal Encoding** 

Essential feature

The total number of comments before selected base date/time.

31

CC2

**Decimal Encoding** 

**Essential feature** 

The number of comments in last 24 hours, relative to base date/time.

32

CC3

**Decimal Encoding** 

**Essential feature** 

The number of comments in last 48 to last 24 hours relative to base date/time.

33

CC4

**Decimal Encoding** 

Essential feature

The number of comments in the first 24 hours after the publication of post but before base date/time.

34

CC5

**Decimal Encoding** 

Essential feature

The difference between CC2 and CC3.

35

Base time

Decimal(0-71) Encoding

Other feature

Selected time in order to simulate the scenario.

36

Post length

**Decimal Encoding** 

Other feature

Character count in the post.

37

**Post Share Count** 

تزيم Decimal Encoding

Other feature

This features counts the no of shares of the post, that how many peoples had shared this post on to their timeline.

38

Post Promotion Status

Binary Encoding

Other feature

To reach more people with posts in News Feed, individual promote their post and this features tells that whether the post is promoted(1) or not(0).

39

H Local

Decimal(0-23) Encoding

Other feature

This describes the H hrs, for which we have the target variable/ comments received.

40-46

Post published weekday

Binary Encoding Weekdays feature

This represents the day(Sunday...Saturday) on which the post was published.

47-53
Base DateTime weekday
Binary Encoding
Weekdays feature

This represents the day(Sunday...Saturday) on selected base Date/Time.

54 Target Variable Decimal Target

The no of comments in next H hrs(H is given in Feature no 39).

```
library(readr)
 Features Variant 1 <- read.csv("C:/users/seshan/Documents/Dataset/Dataset/Tr</pre>
aining/Features Variant 1.csv")
